End User License Agreement (EULA) for Mixed Motion rPPG Video Dataset

About the Dataset: Mixed Motion rPPG Video Dataset is a facial video dataset specifically designed for remote photoplethysmography (rPPG) research in hybrid physical activity scenarios. Unlike datasets collected under static or uniform motion conditions, NBSLAB-fitness simulates realistic and dynamic transitions between rest, walking, and running, providing a challenging yet practical benchmark for evaluating the robustness of heart rate estimation algorithms.

Agreement Terms

By accessing or using this dataset, the user agrees to the following terms and conditions:

- Non-Commercial Use Only

The dataset is strictly for non-commercial academic research. Prohibited commercial uses include, but are not limited to: product development or validation, commercial advertisement or promotion, resale or redistribution, and military or surveillance system development.

- User Responsibility

A valid institutional email must be provided. If the user is a student or temporary researcher, a supervisor must sign and assume full responsibility. The signer is accountable for all listed associated users.

- Data Handling and Distribution

Store the data securely with restricted access. Do not redistribute any part of the dataset. In publications or presentations, only include anonymized or identity-masked data if absolutely necessary. Avoid showing participant traits unless required for scientific clarity.

- Publication and Citation

All research outputs using this dataset must cite the following: [Insert citation info for related dataset paper(s)]. DOI or URL: [Insert link].

- Revocation of Access

Violation of any term in this EULA may result in immediate revocation of dataset access.

Access Instructions

1. Complete the signatory information below.
2. Send a scanned, signed copy to: [your email address].
3. Access credentials will only be issued to verified academic accounts.
